

EXECUTIVE OPERATING ARTIFACT

Manufacturing Shape Review

A recurring decision mechanism for customer promise, capability, capacity, control, and leadership depth.

THE REVIEW SEQUENCE

1. Promise	Which customer, safety, quality, delivery, or recovery commitment is at risk or changing?	DEFINE NON-NEGOTIABLES
2. Capability	Which process knowledge, technology, site competency, supplier, utility, or talent dependency matters?	PROTECT DIFFERENTIATION
3. Capacity	What constraint, utilization, demand, make-buy, capital, and timing evidence changes the configuration?	COMPARE OPTIONS
4. Control	Who decides, who executes, what escalates, what is measured, and how does learning return?	MAKE EXECUTION DURABLE

BALANCED SCORECARD - DEFINE BASELINES BEFORE TARGETS

DIMENSION	MEASURE CATEGORIES	DECISION ENABLED
Safety	Events, leading observations, corrective-action closure, process safety	Where intervention and leadership attention go
Quality	Escapes, yield, scrap, rework, capability, complaint recurrence	Where process control or technical ownership changes
Delivery	Service, schedule adherence, past due, recovery, constraint exposure	Which customer promises require action
Cost / productivity	Conversion cost, labor, uptime, maintenance, inventory, loss categories	Improve, invest, consolidate, or redesign work
Capacity	Demonstrated rate, utilization, bottleneck, demand scenarios, flex	Capex, make-buy, allocation, and footprint
NPI / technology	Readiness gates, process capability, training, yield, ramp risk	Proceed, hold, contain, transfer, or stop
Leadership	Critical-role coverage, succession, skill depth, change load	Develop, hire, retain, sequence, or support

REQUIRED DECISION RECORD

Decision and date Choice, owner, scope, timing, and review point.	Assumptions and alternatives Demand, capability, cost, timing, customer impact, and the real options considered.
Evidence and confidence Baseline, units, source, freshness, uncertainty, and missing proof.	Learning return What becomes standard, what stays local, and what changes at the next review.

DECISION CADENCE

Weekly Promise risk, containment, owner, recovery date.	Monthly Operating economics, root cause, action closure.
Quarterly Network shape, capital, make-buy, leadership depth.	Annual Strategy refresh, portfolio, technology, investment sequence.
