

Russell Dudek

Manufacturing Strategy & Operations Executive | Confidential Organization

EXECUTIVE PROFILE

Operator-technologist who makes complex manufacturing work visible, connects technical and business teams, and builds operating mechanisms that turn emerging technology into adopted, measurable outcomes.

ROLE-ALIGNED CAPABILITIES

- Global manufacturing strategy; safety, quality, delivery, cost and customer promise.
- Advanced electronics and high-reliability operations.
- Capacity, constraints, capital, make-buy and technology-transfer logic.
- Lean, Gemba, standard work, root cause and continuous improvement.
- Digital operations, robotics, machine vision, telemetry, ERP and AI-assisted workflows.

SELECTED EXPERIENCE

■ Vape-Jet | Director of Operations | 2025-Present

Leads AI-first operating transformation across production, purchasing, quality, customer success, support, engineering issue flow, ERP/Odoo, Jira, HubSpot, Slack, telemetry and AI-assisted workflows. Connects factory, field, customer and machine-fleet signals into prioritized work. Operates in a robotics and machine-vision environment with approximately 1,000 fielded robots.

■ Compunetics | Director of Operations and Engineering Management | 2000-2013

Progressed through R&D program management, production management, strategic acquisition, operations management and director-level leadership. Led engineering, manufacturing, quality, customer delivery and complex technical programs in advanced electronics and high-reliability environments. Built quality systems, standard work, root-cause practices, performance measures and process controls.

Russell Dudek | Evidence Continuity

Advanced manufacturing, distributed operations, technical translation and leadership systems

SELECTED EXPERIENCE CONTINUED

■ Amazon | Operations Management / Site Leader | 2014-2018

Led launch and execution for Amazon Prime Pittsburgh in a 24/7 customer-backward environment supporting approximately five million second-day orders annually. Built leadership routines, labor planning, throughput visibility, escalation paths, standard work and operating mechanisms across safety, quality, throughput, customer experience and team engagement.

■ ZeusVu | Founder / Operator

Led regulated autonomous drone operations across medical, energy, logistics and restricted-airspace use cases with a verified 100% safety record and no FAA incidents.

■ Technical foundation

B.S., University of Pittsburgh. Materials science and physical chemistry grounding. Published industry articles, delivered technical talks, participated in the HyperTransport Consortium, and translated novel materials and high-speed electronics concepts for partners including Intel and AMD.

LEADERSHIP THESIS

Standardize the operating contract. Differentiate the technical capability. One enterprise cadence for customer promise, capacity, capital, escalation and learning - without erasing legitimate local process knowledge.

FIRST 120 DAYS

- 0-30: Read the promise and earn site-leader trust.
- 31-60: Make the network shape, constraints and decision rights visible.
- 61-90: Prove one consequential capacity, NPI, footprint, make-buy or transfer decision.
- 91-120: Commit a sequenced manufacturing portfolio and leadership operating calendar.
